

## EE-Oz Training Standards

## Competency Development Model

Competency standard units that form National Qualifications

### On-the-Job Development

#### Work Performance Specification (WPS)

Documented learning strategies that clarify the work related activities and experiential requirements; *one per Unit*

Experiences by exposure to recurring workplace events and directed activities that are supervised

Assessment based on evidence of demonstrated performance associated with a representative range of equipment and the like, found in the workplace

Failure to meet requirements

### Off-the-Job Development

#### Knowledge and Skill Specifications (EKAS LSs)

Documented learning strategies that clarify the essential knowledge & associated skills & assessment requirements; *one to many per Unit*

Delivery through structured educational activities that involve discussion, interaction, adaptation, and reflection, using a variety of resources and techniques

Assessment based on evidence of understanding and application of skills

Failure to meet requirements

#### Final Decision

Evaluation of all developed evidence; by gathering all previous assessment results, including, where required a final test of critical infrequently used K&Ss

National Qualification
