

Notes to Matrices

Work Performance modules (Prefix NEWPXXX) - Developed for each unit of competence, provides the specifications, methods and criteria for gathering evidence that shows a person the levels of performance that must be achieved as specified in each unit, including where applicable each particular category.

Optional units are directly linked to the specialisation chosen, the underpinning knowledge and skills called up by these units are unique, and additional to the underpinning knowledge and skills called up by the core units. All Core units and the Specialisation chosen are compulsory. With the selection of the Optional unit the total number of modules chosen towards the qualification remain unchanged as the modules underpinning the specialisation unit are replaced with the modules underpinning the optional unit.

^ Endorsement to be reported (qualifier)

~ Provides methods and criteria for gathering evidence that shows a person has achieved the levels of performance specified in each unit for each particular category

Optional units require more modules than what are shown in this area of the matrix. They are not shown because they are in part or full the same modules that support the core unit. These being compulsory. For full details reference needs to be made to the respective units of competence.
